

Remarks

Claims 1 through 23 remain pending in the application.

The advisory action indicates that the Examiner is unable to find Applicant's definition of "computational resources" on page 1, ll. 21-26 under the assertion that the specification starts with page 3. PTO records reflect that all of the pages of the specification, including pages 1-2 as filed, are contained and accessible in the present application. Specifically, PCT application No. PCT/SG2002/000206, published as International Publication No. WO2004/023821, is the complete specification that is part of the electronic file of this application. In addition, telephone conversations with Examiner Jessica Roberts and SPE Dastouri Mehrdad confirm that the PAIR electronic filing system contains the complete copy, including pages 1-2, of the specification.

Therefore, because all of the requested pages appear in the electronic record, Applicant requests prompt action on the merits in light of the fact that the term "computational resources" is defined in the specification.

Conclusion

This response has addressed all of the Examiner's grounds for objection. Reconsideration of the rejections and allowance of the claims is requested.
